## PROFESSIONAL SUMMARY

3rd-year Computer Science Engineering student (CGPA: 9.28/10) with hands-on experience building and shipping full-stack web applications using the MERN stack, backed by a strong foundation in Data Structures & Algorithms. Independently designed and built 3 full-stack projects spanning real-time communication, authentication, and platform architecture. Finalist in 3 national-level hackathons. Currently deepening skills in Machine Learning and Generative AI, with a focus on integrating them into full-stack products.

## TECHNICAL SKILLS

**Languages:** C, C++, Java, Python, JavaScript (ES6+)  
**Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design  
**Backend:** Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture  
**Database:** MongoDB, Mongoose, SQL  
**Tools & Platforms:** Git, GitHub, Postman, Vercel, VS Code, Google Cloud Platform  
**Concepts:** DSA, OOP, Agile/Scrum, Generative AI, Prompt Engineering

## PROJECTS

- CodeForge — DSA Learning & Coding Assessment Platform** MERN Stack
- Designed and built a full-stack coding-assessment platform combining algorithm visualizations, LeetCode-style problem sets, and leaderboard-based performance tracking to support structured DSA practice.
  - Engineered video-proctoring and tab-switch detection to preserve assessment integrity during timed, competitive coding tests.
- SkillSwap — Campus Skill-Exchange Platform** MERN Stack
- Built a peer-to-peer platform enabling students to discover, connect, and collaborate with peers across technical, academic, and professional skill domains.
  - Implemented real-time messaging, secure user authentication, and a skill-matching system to connect learners with relevant mentors and peers.
- Samvaad — Real-Time Chat Application** MERN Stack
- Developed a real-time one-to-one and group messaging application using Socket.io for live, low-latency communication.
  - Implemented live presence tracking, JWT-secured authentication, and a responsive interface for a seamless cross-device experience.
- SheCity AI — Women Safety Platform**
- Engineered an AI-powered platform for route safety analysis and real-time risk zone identification.
  - Implemented location-aware safety insights through scalable MERN-based architecture and secure APIs.

## EXPERIENCE

- Infosys Springboard Virtual Internship 7.0** Sep 2026
- Selected for a competitive industry internship program through a multi-stage evaluation process, will work on real-world engineering problems under industry mentorship.

## EDUCATION

**B.Tech, Computer Science Engineering — K.K. Wagh Institute of Engineering Education & Research, Nashik** 2024 – 2028  
CGPA: 9.28/10 | Relevant Coursework: DSA, OOP, DBMS, Computer Networks, Operating Systems

## ACHIEVEMENTS & CERTIFICATIONS

- Finalist — Nirmaan Hackathon (Amity University Mumbai), PVG HackHub, and Innovera National Hackathon, out of 6+ hackathons and technical competitions entered.
- Job Simulations (Forage): Cybersecurity Analyst — Tata Consultancy Services; Software Engineering — JPMorgan Chase & Co.
- Certifications: Infosys Springboard (AI Primer, Generative AI, Deep Learning, NLP, Computer Vision, Agile Scrum in Practice); Google Cloud Arcade (Full Program Completion); Full Stack Web Development & Node.js Projects: Learn by Doing — Udemy; Google AI Essentials & Google Prompting Essentials — Coursera; Claude Code in Action — Anthropic.
